

# STREET SWEEPING

We at Dejana own, operate and maintain in excess of 180 sweepers. We know what it takes to provide a service your residents will appreciate. We know how to repair sweepers and keep them running. Our knowledge and economies of scale permit us to provide you an economic alternative to “doing-it-yourself.”

Municipalities are confronted today with the challenge of maintaining services with fewer resources, reduced or eliminated because of budget considerations. Contract sweeping permits the continuation of services within an acceptable economic framework.

Power sweepers today are \$175,000+, and the required maintenance to keep them running is often expensive for a municipality or small company with only a few sweepers.

We know that the economics of a sweeping program are important to everyone. Your actual costs will be dependent on the nature of the service you specify and the responses you receive in the competitive bidding process.

When we provide a bid, we will include an estimate based on your specific needs.

## SERVICE PLAN FEATURES

- Sweeping the roads one time per week.
- Disposal of all material will be at a site you provide.
- Use of the Dejana “Power Broom” sweepers or “Regenerative Air” sweepers dependent on the time of year and the nature of the debris on the streets.\*
- All manpower and equipment will be provided by Dejana.
- Option to add on leaf removal in the fall at an additional fee.
- Regular street sweeping can be included as a preventive maintenance activity in partial fulfillment of annual Municipal Separate Storm Sewer System (MS4) reporting requirements.

## BENEFITS TO OUT-SOURCING

- Resources - Free up your teams to work in other areas.
- Reliability - If we are required to sweep the streets one time per week, it is done without fail. Why? Contracts for sweeping tend to be for services performed; inclement weather (snow, ice or torrential rain) is the only reason we would not sweep when we are contracted to do so.
- Focus: With Dejana taking care of your sweeping needs, your time is dedicated to providing public works more services to your residents.
